**NATURE OF ACTION**

1. This is an action for patent infringement under the patent laws of the United States, 35 U.S.C. §§ 271, *et seq.*, to obtain damages resulting from Defendant’s unauthorized and ongoing actions, in the state of Texas and elsewhere, of making, having made, using, selling, having sold, offering to sell, and/or importing or having imported into the United States, systems on a chip (“SoCs”) that infringe one or more claims of ZiiLabs’ United States Patent No. 6,677,952 (the “952 Patent”), United States Patent No. 6,950,350 (the “350 Patent”), United States Patent No. 7,518,616 (the “616 Patent”), and United States Patent No. 8,643,659 (the “659 Patent”) (collectively, the “Asserted Patents”).

2. This is an action for direct infringement. Upon information and belief, Defendant makes, has made, uses, sells, offers to sell, imports, and/or has imported into the United States

certain SoCs that infringe one or more of the Asserted Patents, either literally or under the doctrine of equivalents (collectively, the “Accused Products”).

3. In addition, this is an action for indirect infringement. Upon information and belief, Defendant contributes to or induces the direct infringement, either literally or under the doctrine of equivalents, of one or more claims in the Asserted Patents.

4. ZiiLabs asserts that Defendant infringes the following claims:

Asserted Patent	Asserted Claims

10. This Court has subject matter jurisdiction pursuant to 28 U.S.C. §§ 1331 and 1338(a) because this action arises under the patent laws of the United States, 35 U.S.C. §§ 101 *et seq.*

11. Upon information and belief, Defendant is subject to personal jurisdiction in the Eastern District of Texas because it regularly transacts business in this judicial district and engages in continuous and systematic contact with Texas. Defendant offers products to customers, business affiliates, and/or partners located in this judicial district. In addition, Defendant has committed acts of infringement of one or more claims of each of the Asserted Patents in this judicial district. 16. Venue is proper in the Eastern District of Texas under 28 U.S.C. §§ 1391(b) and (c) as well as 28 U.S.C. § 1400(b) because Defendant is subject to personal jurisdiction in this district and has committed acts of infringement in this district.

## **COUNT I**

### **(Infringement of the '952 Patent)**

17. Paragraphs 1 through 16 are incorporated by reference as if fully restated herein.

18. On January 13, 2004, United States Patent No. 6,677,952 (the “'952 Patent”) was duly and legally issued for “Texture Download DMA Controller Synching Multiple Independently Running Rasterizers.” The '952 Patent is in full force and effect. A true and correct copy of the '952 Patent is attached hereto as Exhibit 1 and made part hereof.

19. ZiiLabs is the assignee and owner of the '952 Patent with the exclusive right to enforce the '952 Patent against infringers and the exclusive right to collect damages for all relevant times, including the right to prosecute this action.

20. Upon information and belief, Defendant – without authority, consent, right, or license – manufactures, makes, has made, uses, sells, offers for sale, and/or imports into the United States the Accused Products, which directly infringe, either literally and/or under the doctrine of equivalents, or enable the practice of, at least one claim of the '952 Patent.

21. For example, Exhibit 2 includes a chart comparing the asserted independent claims of the '952 Patent to a product containing Defendant's MT6755 (Helio 10) product. Exhibit 2 shows that the Accused Products and their use are covered by at least the asserted independent claims of the '952 Patent.

22. Further, upon information and belief, Defendant has indirectly infringed at least one claim of the '952 Patent by inducing infringement.

23. Defendant has been aware of the '952 Patent and of ZiiLabs' allegations of infringement since at least August 18, 2016, when ZiiLabs sent Defendant notice letters.

24. Despite Defendant's awareness of the '952 Patent and ZiiLabs' allegations, Defendant has knowingly and actively induced others to infringe the '952 Patent by selling Accused Products which induce the direct infringement of at least one of the claims of the '952 Patent by end-users – for example, customers. These Accused Products are pre-programmed to function in the manner claimed in the '952 Patent. Upon information and belief, at least one customer has directly infringed one or more claims of ZiiLabs' '952 Patent.

25. Defendant has provided and continues to provide products that cannot and do not operate except in a manner that infringes the '952 Patent. As shown for the representative

product containing an Accused Product (Exhibit 2), Defendant's Accused Products function in a manner that infringes the claims of the '952 Patent. At least by providing users with products that necessarily infringe the '952 Patent, Defendant has induced and is actively inducing infringement of at least one claim of ZiiLabs' '952 Patent.

26. Further, upon information and belief, Defendant has also indirectly infringed at least one of the claims of the '952 Patent by contributing to infringement.

27. The Accused Products are made solely for the purpose of operating in a manner that infringes at least one claim of the '952 Patent. Further, these Accused Products are especially made and/or especially adapted for use in the infringement of ZiiLabs' '952 Patent, are not staple commodities of commerce, and are not suitable for substantial non-infringing use. By providing these Accused Products, Defendant has contributed to the infringement of the '952 Patent by end-users – for example, customers – who use said Accused Products.

28. As a result of Defendant's infringing conduct, ZiiLabs has suffered damages and will continue to suffer damages in an amount that, by law, cannot be less than a reasonable royalty, together with interest and costs as fixed by the Court under 35 U.S.C. § 284.

33. For example, Exhibit 4 includes a chart comparing the asserted independent claims of the '350 Patent to a product containing Defendant's MT6755 (Helio 10) product. Exhibit 4 shows that the Accused Products and their use are covered by at least the asserted independent claims of the '350 Patent.

35. Defendant has been aware of the '350 Patent and of ZiiLabs' allegations of infringement since at least August 18, 2016, when ZiiLabs sent Defendant notice letters.

Despite Defendant's awareness of the '350 Patent and ZiiLabs' allegations, Defendant has knowingly and actively induced others to infringe the '350 Patent by selling Accused Products which induce the direct infringement of at least one of the claims of the '350 Patent by end-users – for example, customers. These Accused Products are pre-programmed to function in the manner claimed in the '350 Patent. Upon information and belief, at least one customer has directly infringed one or more claims of ZiiLabs' '350 Patent.

37. Defendant has provided and continues to provide products that cannot and do not operate except in a manner that infringes the '350 Patent. As shown for the representative

product containing an Accused Product (Exhibit 4), Defendant's Accused Products function in a manner that infringes the claims of the '350 Patent. At least by providing users with products that necessarily infringe the '350 Patent, Defendant has induced and is actively inducing infringement of at least one claim of ZiiLabs' '350 Patent.

38. Further, upon information and belief, Defendant has also indirectly infringed at least one of the claims of the '350 Patent by contributing to infringement.

39. The Accused Products are made solely for the purpose of operating in a manner that infringes at least one claim of the '350 Patent. Further, these Accused Products are especially made and/or especially adapted for use in the infringement of ZiiLabs' '350 Patent, are not staple commodities of commerce, and are not suitable for substantial non-infringing use. By providing these Accused Products, Defendant has contributed to the infringement of the '350 Patent by end-users – for example, customers – who use said Accused Products.

40. As a result of Defendant's infringing conduct, ZiiLabs has suffered damages and will continue to suffer damages in an amount that, by law, cannot be less than a reasonable royalty, together with interest and costs as fixed by the Court under 35 U.S.C. § 284.

60. Despite Defendant's awareness of the '659 Patent and ZiiLabs' allegations, Defendant has knowingly and actively induced others to infringe the '659 Patent by selling Accused Products which induce the direct infringement of at least one of the claims of the '659 Patent by end-users – for example, customers. **COUNT V**

**(Willful Infringement of the Asserted Patents)**

65. Paragraphs 1 through 64 are incorporated by reference as if fully restated herein.

66. As of the date of filing of this complaint, Defendant has been on actual notice of the Asserted Patents and ZiiLabs' infringement allegations for at least over six months. ZiiLabs sent Defendant notice letters containing these allegations on August 18, 2016, and requested that Defendant engage in licensing discussions regarding the Asserted Patents.

67. Although certain correspondence and communications were exchanged between the parties, no significant licensing discussions have been held.

68. Despite actual notice for over six months, Defendant was objectively reckless, and acted despite an objectively high likelihood that its actions constituted infringement of the valid Asserted Patents, in continuing to make, use, sell, offer for sale, and import its Accused Products.

69. The continued infringement of the Asserted Patents by Defendant is deliberate and willful, entitling ZiiLabs to increased damages under 35 U.S.C. § 284 and to attorney fees and costs incurred in prosecuting this action under 35 U.S.C. § 285.

**JURY DEMAND**

ZiiLabs hereby requests a trial by jury pursuant to Rule 38 of the Federal Rules of Civil Procedure.
